

 <p>MaineHealth CANCER CARE NETWORK SUPPORTED BY THE HAROLD ALFOND® FOUNDATION</p>	<p>Breast Cancer Specialty Tumor Board</p> <p>Referral Guideline</p>	
	Original Date: 10-27-15	Review Date:
	<p>MaineHealth Breast Work Group</p>	

Patients in the following categories should be reviewed after biopsy before definitive management by a MaineHealth Breast Regional Oncology Tumor Board:

- A. Case with evident complexity
 - 1. Pregnancy
 - 2. Age <35
 - 3. Prior chest radiation >20GY prior to the age of 30
 - 4. Questioned inflammatory breast cancer

- B. Pathology that would support consideration for neoadjuvant chemotherapy
 - 1. Her2neu +
 - 2. Triple Negative

- C. All cases from hospitals having a small volume of breast surgery cases (defined as less than 13 cases per year) be reviewed at a tumor conference (or consulted on by a breast specialist) at MMC, MGMC or a MH NAPBC accredited hospital (St. Mary's or Southern Maine Healthcare).

- D. Complex cases as deemed by treating provider
