

STRATEGY 8: Partner with and Educate Families in Adopting and Maintaining a Lifestyle that Supports Healthy Eating and Active Living

why does this matter?

Parents and caregivers:

- Create an environment for kids that encourages either active or inactive lifestyles.
- Make the choices about what types of foods and meals the family eats.
- Model eating and physical activity behaviors.^{1,2}

Partnerships with families can ensure that kids receive consistent messages about healthy behaviors. Families can then engage, guide, and motivate kids to eat healthy foods and be active.³

Kids pick up attitudes and behaviors about eating and physical activity from parents and caregivers.^{1,2}

Parents and caregivers must be involved in promoting healthy lifestyles in order to achieve long-lasting behavior change.¹
