Let's Go! Cafeteria Signage

The purpose of this Let's Go! Cafeteria Signage is to assist you with promoting your program and boost consumption of healthy, reimbursable school meals. We know the use of fun and colorful signs can attract students to the healthy options and participate in school meals.

Build a Healthy Lunch Poster: This poster creates a student-friendly visual of their meal tray and can be used to promote your reimbursable meals or featured entrée. Place in a highly visible place allowing students to plan their meal choices ahead of time.

Fruit and Vegetable Signs: These postcard size signs provide you with descriptive names for 20 different fruits and vegetables. These can be displayed on the salad bar, fruit bowls, point-of-sale, or any location on the line where fruits and vegetables are being served.

Milk Posters: These can be displayed

milk coolers or throughout the cafeteria.

Water Posters: These can be displayed by water stations, a la carte coolers, or throughout the cafeteria.

Interested in printed signage? Contact [Let's Go!](#) for more information.
