Gilman Street Closure, June 1-30

As part of the dismantling of the employee garage, contractors have determined they will need to close lower Gilman Street to through traffic from June 1-30 in order to ensure worker safety.

While this was not part of our original plan, the need became apparent in recent weeks, and MMC apologizes for any inconvenience this causes. The need for taking the street became known as the subcontractor that will be doing the dismantling work began to conduct more on-site surveys.

During this planning process, they determined the only safe way for them to use the large dismantling equipment on the first part of the building was to stage the machinery further back onto the street, so they were not removing concrete directly above their work zone.

We are optimistic that the work will be completed quickly and the road will be re-opened sooner than planned for. We will post any updates on the progress here at www.mmc.org/modernization.

During the closure, Gilman Street residents will need to access their neighborhood via A Street. Pedestrian access will remain open, on the west side of Gilman Street. Signs will be deployed to help direct traffic.
