Construction Update: Gilman Street Road Project

Construction crews have uncovered various underground challenges as they have progressed on the Gilman Street roadwork, impacting the overall construction timeline access to the Gilman Street neighborhood.

Thursday, Oct. 10, until Monday, October 14, work will shift from the intersection of Gilman and Congress streets to a single lane up Gilman Street to the garage entrance. We strongly recommend accessing Gilman Street via A Street, as accessing via Congress Street may be difficult.

From Monday, October 14, through Friday, November 8, all access to the Gilman Street neighborhood will be through A Street. The section of Gilman Street between the garage entrance and A Street will be blocked entirely.

Given the unpredictable nature of this work, the dates and exact plans will likely shift. We will deploy signage and flaggers to help direct traffic, and post any significant changes at www.mmc.org/modernization.
