MMC Buys Fire-Damaged Building

Maine Medical Center has purchased the fire-damaged building at 274 Valley St., and intends to demolish the structure in mid- to late-December.

Ahead of demolition, contractors will perform standard hazardous material abatement typically involved with a building of this age, appropriately disposing of debris containing asbestos and lead. Shaw Brothers Construction will be doing the demolition work, expected to last a week or two.

MMC has no immediate plans for the property, which is within the medical center's Institutional Overlay Zone, and will maintain it as a loamed and seeded lot until a potential purpose is identified.
