Temporary Taking of Parking Spots; Garage Lights and Congress Tower Update

Utility Work/Parking Spots

On **Monday, Feb. 24** and **Tuesday, Feb. 25**, crews will be running utility lines from D Street down St. John Street to Congress Street. This will necessitate the temporary taking of the on-street parking spots (approximately 23) on that section of St. John Street.

The crews will only need the spaces from 7 a.m. to 4 p.m. on those two days; the spaces will be available for parking outside those hours. In addition, residents and others needing a parking space when the work is being performed are welcome to park in our surface lot behind 222 St. John Street.

Signs noting the temporary parking change will go up this **Friday, Feb. 21**.

Garage Lights

In related news, MMC contractors plan to install the light shields on the top deck of the parking garage also on **Monday, Feb. 24** and **Tuesday, Feb. 25**. During this installation, crews will turn on the lights on the top deck for 20-30 minute periods at night to test and adjust the shielding.

The top deck of the garage is expected to open for employees this spring, and the lights would be activated at that time.

Congress Tower Update

Crews continue to do internal dismantling of our Gilman Garage. They expect to start the exterior dismantling in the next several months. Posted below is an update sheet that gives high-level information about the project and an estimated timeline.
