Vascular Laboratory Ultrasound Services

Vascular Ultrasound Performance

At Maine Medical Partners – MaineHealth Cardiology we are dedicated to delivering the highest quality care and services to our patients. Our vascular ultrasound examinations are performed by experienced technologists using state-of-the-art equipment and interpreted by one of our ten Board certified cardiologists who have been specially trained in the interpretation of vascular testing.

Importance of Testing

Cardiovascular diseases are the number one cause of death in the United States. Early detection of life threatening heart disorders, stroke, and other diseases is possible through the use of vascular testing procedures performed within hospitals, outpatient centers and physicians' offices.

Maine Medical Partners – MaineHealth Cardiology's vascular laboratory has been granted renewed accreditation in vascular testing in the areas of visceral vascular testing, extracranial cerebrovascular testing, and peripheral arterial testing by the Intersocietal Accreditation Commission (IAC).

Our Services

We offer the following vascular testing services:

- Carotid artery duplex
- Ankle brachial index and segmental pressures of the lower extremities
- Peripheral arterial duplex sonography of the upper or lower extremities
- Abdominal aortic ultrasound
- Peripheral venous duplex for venous insufficiency, varicose vein work-up and/or deep venous thrombosis
- Renal artery duplex imaging
- Mesenteric artery duplex imaging

Referral Process

Patients may be referred for either testing only or testing with vascular physician consult. To refer your patient, please call our office at (207) 774-2642.

We offer vascular testing at our South Portland, Scarborough, Lewiston, Augusta, and Rockport locations.

For same day appointments and results, contact our Scarborough or South Portland locations. Please contact all other offices directly for appointment availability.
