# Pediatric Travel Clinic

## About Our Clinic

The Pediatric Travel Clinic is part of Maine Medical Partners - Pediatric Specialty Care. The clinic is staffed by Board certified Pediatric Infectious Disease physicians.

## What to Expect

We recommend your initial appointment be at least 6-8 weeks prior to departure. A copy of your child's immunization record will be needed for review. Some vaccines require multiple doses administered weeks apart for effective protection. During the consultation, physicians provide health information specific to the countries you will visit. This includes counseling regarding food and waterborne diseases, animals, insect control, and other health concerns. Together, you will review your child's health and immunization history and the physician will recommend specific vaccinations and preventative therapy for diseases such as malaria as necessary.

## Follow-Up Care

Travelers may experience illness after returning home. Children may be evaluated in our clinic for such occurrences.

Some vaccines require additional shots following travel.

## Financial Policy

Travel medicine is not covered by some health insurance plans. The cost of the visit depends upon several factors, such as the complexity of the travel itinerary, as well as the number and types of immunizations required. If your insurance plan requires a referral for specialist visits, you must secure this before your appointment.

## Available Vaccines

- Hepatitis A
- Immunoglobulin
- Japanese Encephalitis
- Meningococcal
- Rabies
- Typhoid
- Yellow Fever
