Patient diagnosis of MR by TTE

ASSESS CLINICAL CONTEXT
Distinguish MR type

Primary MR
Mixed MR
Secondary MR

Mild or Moderate MR

Symptomatic
Asymptomatic

Diagnostic Testing for Secondary MR Etiology and LV Function

Other secondary MR
Ischemic MR

If MR severity or symptom status is questionable, consider alternative diagnosis of further testing with:
- Exercise stress
- Repeat TTE ± TEE

Guideline-Directed Management and Therapy (GDMT), EP, and HF evaluation
Consider revascularization as indicated

Consider surgery/transcatheter therapy per MDT consensus

Other secondary MR
Ischemic MR

Guideline-Directed Management and Therapy (GDMT), EP, and HF evaluation
Consider revascularization as indicated

Consider repeat noninvasive imaging to verify MR Severity

Follow-up with primary cardiologist

Moderate or Severe MR
Mild MR
