

-NEUROSCIENCE ADMISSION GRID (Non Trauma) Last revised 1-2-2014

- 1) These Guidelines apply to all patients with a Non-Traumatic Neurological condition who are in an ED or inpatient at another facility seeking transfer.
- 2) Communication between services and REMIS/OneCall who will make those connections is a crucial factor in assuring the patient is placed in the most appropriate service.
- 3) The Guidelines should not trump common sense. Potential exceptions to the rule include:
 - a. Comfort Measure Only level patients can be cared for on a general Med-Surg unit if not intubated or requiring ICU- level care for another reason.
 - b. Trauma is a separate grid but some patients with traumatic injuries may be best served on a medical service with trauma consult. (Refer to Adult and Pediatric Trauma Policies).
 - c. Selective consultation is encouraged when appropriate.

KEY: IM = Internal Med & Family Med teaching service and FM/IM PCP who admit to the IM PA service. NCC = Neurocritical Care	Spontaneous Subarachnoid Hemorrhage	Stroke/ Ischemia-TIA	Subdural Hematoma without trauma	Intra-parenchymal Hemorrhage (most other brain hemorrhages)	Seizure (Ø mass)	Mass
Contact: Contact team is expected to evaluate the patient unless excused by admit team	Neurosurgery (must discuss with NCC attending)	Neurology	Neurosurgery (must discuss with NCC attending)	Neurocritical care	IM or NCC	Neurosurgery
Admitting Team: Admission by a team other than listed should be based on Attending to Attending Communication	Neurocritical care	NCC if tPA, cerebellar infarct, or large vessel occlusion AIM if no tPA	Neurocritical Care	Neurocritical Care	AIM or NCC	Neurosurgery or Neurocritical Care
Internal Communication: REMIS-OneCall will notify ED of all pts expected to transfer to the ED and all appropriate Bed Coordinators	Neurocritical Care mandatory contact	NCC if tPA, or large cerebellar infarct, or very large anterior circulation infarction - Otherwise AIM – mandatory contact Neurology request that REMIS-OneCall facilitate this contact	Neurocritical Care mandatory contact		Neurology	Neurosurgery will request that REMIS-OneCall facilitate a NCC or AIM connection if needed
Other possible consultants:	Neuroendovascular	Neurosurgery Neuroendovascular	Neurology	Neurology Neurosurgery	Neurology	Neurology
