

Food Insecurity at MaineHealth

Screening & Resource Distribution between October 1, 2020 and September 30, 2021

Thanks to a partnership with Good Shepherd Food Bank, over 35,700 pounds of nutritious food were distributed to patients in need through provider offices, including more than 14,500 pounds of fresh produce.

In addition, our two hospital-based food pantries in Farmington and Norway, which opened summer of 2021, stocked their shelves with almost 8,000 pounds of healthy food for patients, families and care team members in need.
