

## HBSAB Result Interpretation Guide

The Anti-HBs test is reported as **Negative**, **Equivocal** or **Positive** relative to the following quantitative result ranges:

<b>Initial Result Range</b>	<b>Reported Result</b>	<b>Interpretation</b>
<8.00 mIU/mL	Negative	Individual is considered not immune to HBV infection.
≥8.00 mIU/mL < 12.00 mIU/mL	Equivocal	The immune status of the individual should be further assessed by considering other factors, such as clinical status, follow-up testing, associated risk factors, and the use of additional diagnostic information.
≥ 12.00 mIU/mL	Positive	Individual is considered immune to HBV infection.
