

TUFTS UNIVERSITY SCHOOL OF MEDICINE— MAINE MEDICAL CENTER

Maine Track Program

Undergraduate Medical Education Teaching Partnership

2022 Program Report

The Tufts University School of Medicine – Maine Medical Center Maine Track Program was founded with three primary goals in mind: to address the shortage of doctors in Maine; to offer Maine’s brightest students the financial means to pursue a career in medicine; and to develop an innovative curriculum focused on community-based education.

**A Maine Track Milestone:
Trailblazing Program Graduates 10th Class of Physicians**

After a pandemic-related hiatus, 2022 saw a return of the Maine Track Alumni Reunion event. In October, alumni gathered at Rising Tide Brewing Company in Portland to reconnect and reflect. At this year’s reunion, an important milestone was recognized: there are now 10 classes of Maine Track graduates!

The Maine Track Class of 2013 was particularly well represented at reunion, since 14 physicians – 44% of the Class of 2013 – are now practicing medicine in Maine. Here is a look at where these graduates are practicing:

- **Kathleen Brennan, MD** is practicing Family Medicine at Maine Medical Partners – Falmouth Family Medicine in **Falmouth**
- **Allison Buttarazzi, MD** is practicing Internal Medicine at InterMed, P.A. in **Portland**
- **Matthew Buttarazzi, MD** is practicing Internal Medicine as a Hospitalist at Maine Medical Center in **Portland** and Stephens Memorial Hospital in **Norway**
- **Marya Goettsche Spurling, MD** is practicing Family Medicine at Skowhegan Family Medicine – Redington Fairview General Hospital in **Skowhegan**
- **Lindsey Hathaway, MD** is practicing Medical Oncology and Hematology at Maine General Hospital in **Augusta**
- **Jason Hine, MD** is practicing Emergency Medicine at Southern Maine Health Care in **Biddeford**

- **Janessa Leger, MD** is practicing Emergency Medicine at Maine Medical Center in **Portland**, St. Mary's Hospital in **Lewiston**, and Stephens Memorial Hospital in **Norway**
- **Megan McBrady, MD** is practicing Family Medicine at InterMed Yarmouth Health Center in **Yarmouth**
- **Amanda McDonough, MD, MPH** is practicing Obstetrics and Gynecology at Southern Maine Health Care in **Biddeford**
- **Kelly Pizzo, MD** is practicing Internal Medicine at Portland Gastroenterology in **Portland**
- **Spencer Powers, MD** is practicing Internal Medicine at Maine Medical Partners in **Portland** and Stephens Memorial Hospital in **Norway**
- **Michael Sighinolfi, MD** is practicing Internal Medicine (Gastroenterology) at St. Joseph Healthcare in **Bangor**
- **Chadwick Szylvian, MD, MPH** is practicing Family Medicine at Eastern Maine Medical Center in **Bangor**
- **Holly Thro, MD** is practicing Family Medicine and Psychiatry at Pen Bay Medical Center in **Rockport**

“I really feel that the Maine Track is building a strong community of alumni who are very supportive of students. I cannot wait to become a part of this community and guide students like me toward their career goals and aspirations.”

– Michael McCann, Maine Track Class of 2023, Hometown of Winslow

Maine Track Alumni 2022 Maine Practice Sites By County

Maine Track by the Numbers

- To date, **362** physicians over 10 classes have graduated from the Maine Track Program
- **27%** of Maine Track graduates have matched to Maine Medical Center for their residency training
- **47%** of all Maine Track graduates have chosen a specialty related to primary care (family medicine, internal medicine, and pediatrics)
- **45%** of alumni who have completed training report they are now practicing in Maine

Since Maine does not have a public medical school, Maine-based students who want to become doctors must go out of state for their education. This means that Maine students pay more, whether for out-of-state tuition at a public medical school or for standard tuition at a private school (like Tufts University). The high cost of tuition can discourage Maine students from pursuing medicine as a career path; for those who do, lower-paying specialties in primary care are often overlooked because of their overwhelming student debt.

Scholarship support for Maine students is critical to help offset this financial disadvantage and make medical school more fiscally feasible for Maine's brightest and best. Thanks to the generous support from grants, individual and corporate donors, and state funding, \$2 million in scholarship funding is awarded to Maine Track students each year. Twenty students in each Maine Track class are given an annual scholarship of \$25,000, which significantly reduces their overall tuition costs.

To date, scholarships have been awarded to a total of 281 Maine Track students. The substantial financial support from scholarships continues to open doors for Maine students, allowing them to learn and serve in the communities that helped raise them.

The following **new and renewed named scholarships were awarded to 20 students in the Class of 2026:**

Doctors for Maine's Future Program (supporting 5 students)
Richard & Rakia Hatch Endowed Scholarship Fund (supporting 2 students)
Bingham Scholarship Fund
Betty & Joseph Stocks, MD and Family Maine Track Scholarship Fund
Donald L. McDowell Endowment Fund
Bud Higgins Endowed Scholarship Fund
Spectrum Healthcare Partners Endowed Scholarship Fund
George and Marie Bing-You Endowed Scholarship Fund
Burke Family Endowed Scholarship Fund
Bob & Dottie King Endowed Scholarship Fund
Bacow Endowed Scholarship Fund
Richard Engel, MD Endowed Scholarship Fund
Peter W. Bates, MD Endowed Scholarship Fund
Marr-Anderson Family Foundation Endowed Scholarship Fund
Cate & Richard Gilbane Maine Track Scholarship Fund

The Impact of Maine Track Scholarships:

“With increasing demands on the healthcare system, the need for training competent, well rounded physicians is so important, now more than ever. Your contributions make it more feasible for student like myself with a small town Maine upbringing to pursue a career in medicine and make an impact on the future of healthcare in Maine. You really have helped make my dreams a reality, and for that I will be forever grateful.”

– **Molly Caron, MD, Maine Track Class of 2022, Hometown of Holden**

“I graduated medical school with a medical degree and a residency in my dream specialty. I am forever grateful for the support this scholarship has provided me, which has allowed me to focus on my schoolwork during these four years. You have done this state and so many future physicians a great service, and I am looking forward to the future when I can pay this service forward.”

– **Ketch Cowan, MD, Maine Track Class of 2022, Hometown of Rockland**

“Thank you so much for supporting my education and the education of so many other Mainers! My patients love hearing that I grew up in a town close to them and I am so glad to know that more and more patients will get to hear this with the support of these scholarships.”

– **Allyson Redhunt, Maine Track Class of 2023, Hometown of Gorham**

“I would like to send my most sincere gratitude to my benefactors because their contribution to my medical education has given me something that is very rare these days: peace of mind. Instead of my attention being spent worried about the finances of medical school, you have allowed me to concentrate on my education and succeed in my clerkships. This will undoubtedly make me a better physician one day.”

– **Robert Hallinan, Maine Track Class of 2023, Hometown of Boothbay Harbor**

The Maine Track is a unique program for students committed to pursuing a career in rural medicine. The program's community-based curriculum reflects the wide-ranging skills and knowledge required of rural physicians, offering exceptional learning opportunities in a variety of environments throughout all 4 years of medical school.

Maine Track Orientation Preceptorship

Maine Track students are exposed to rural healthcare during their first few days of medical school orientation. This unique learning opportunity allows students to experience the practice of rural medicine firsthand. As part of orientation, students are placed at healthcare teaching sites from Kittery to Fort Kent and North Conway to Machias, where they spend two days learning from physicians about the challenges and rewards of rural healthcare. This experience also introduces students to current health issues in Maine and local social determinants of health that they are likely to encounter as future physicians.

Interclerkship Week

During their third year, Maine Track students begin hands-on clinical training and practice with patients through clerkships. Maine Track clerkships span the state of Maine: some students participate in the more traditional block rotation through departments within Maine Medical Center, while others complete the Longitudinal Integrated Clerkship (LIC) at a rural hospital.

Because students' clerkship experiences are so vastly different, Maine Track faculty have introduced into course curriculum an opportunity for all third year students to gather and debrief. Interclerkship Week is an innovative course that requires students to leave their clinical clerkships at the midpoint and come back together as a class to review issues they are experiencing in their clerkships. Topics introduced during the first year and second year curriculum – including health care systems, the patient experience, personal/professional development, and population health – are reintroduced, and students benefit from applying their clinical experiences to these concepts which are integral to the delivery of healthcare.

To date, roughly 80 students have received the Interclerkship Week programming. Students have reported positive impacts on their understanding of Maine-based impacts to health care outcomes, on their personal wellness when being able to gather and reflect with peers, and on their ability to address the many “non-medical” aspects of their patients' care that frequently impact outcomes.

Maine Track Class of 2022

The Maine Track Class of 2022 was the 10th class to graduate, adding 46 new physicians to the Maine Track alumni community. 13 members of the Class of 2022 remained in Maine for their residencies, the next phase of their training. 12 members of the Class of 2022 matched to one of 15 highly competitive residency programs at Maine Medical Center. One member of the Class of 2022 matched to the Maine-Dartmouth Family Medicine Program, based in Augusta, Maine.

Maine Track Class of 2026

The Maine Track Class of 2026 includes 40 students—24 of these students grew up in Maine. All 40 have demonstrated an interest in practicing rural medicine by enrolling in the Maine Track, which will immerse them in rural, community-based learning for the next four years.
