- 1 element required per DX code; more is better
- These factors help providers to establish the presence of a diagnosis during an encounter (“if it wasn’t documented, it doesn’t exist”)
- Review problem list, document as ‘current’ or ‘active’
- Do not use ‘history of’ for chronic conditions unless is fully resolved. Instead use ‘stable

- Document anything that impacts your medical decision making** to reflect the complexity and level of care provided.
- Documentation improves care, coverage, costs and compliance.
- other commonly lost conditions: substance/alcohol abuse, AIDS or HIV, mental health severity and status
